Summary

Full-Stack Software Developer and Singapore Polytechnic graduate with a Diploma in Information Technology. Specialized in building scalable web applications using PHP, JavaScript (Node.js/React), and Java. Proven expertise in bridging the gap between complex SQL databases and responsive frontends. Experienced in SAP integration, API development, and automating enterprise workflows to enhance operational efficiency across the full Software Development Life Cycle (SDLC).

Professional Experience

Software Developer Intern

Noel Gifts International Ltd, Singapore
2025 April – 2026 February

- Full-Stack & SAP Integration: Engineered and enhanced internal web applications by bridging PHP/JavaScript frontends with SAP ERP systems; optimized 15+ SQL queries to improve data synchronization speed by 25% and support weekly enterprise reporting.
- Enterprise Automation: Developed end-to-end automation scripts to migrate 500+ monthly manual entries into SAP-integrated modules, reducing processing time by 30 man-hours/month and increasing operational efficiency by 20%.
- Data Analytics (Power BI): Designed and deployed 3 Power BI dashboards utilizing RFM analysis; transformed SAP/SQL datasets (10k+ records) into executive-level metrics supporting monthly strategic decision-making.
- System Infrastructure: Supported enterprise server migration affecting 50+ users and executed UAT cycles (3 phases) to ensure stable system performance and zero-downtime rollout.
- Technical Troubleshooting: Provided Tier-1 support and bug fixes for SAP-connected internal systems, ensuring high availability and resolving user-reported software bottlenecks.

Customer Experience Associate (Hospitality) – Part-Time

Singapore
2023– 2026

- Served 100+ guests per 8–10 hour shift in a fast-paced environment, resolving 90% of issues on the spot to ensure smooth operations and high guest satisfaction.

Education

Singapore Polytechnic

Diploma In Information Technology

(Software Development Specialisation)

3.78/4 Overall GPA

(2023-2026)

Certifications

- Certification in AI Ethics & Governance (Associate), Singapore Computer Society (Feb 2026)

Skills

- Programming Languages: Java, JavaScript (ES6+), PHP, SQL (MySQL, PostgreSQL, SQL Server)
- Libraries & Frameworks: Node.js, React, jQuery, Bootstrap (Responsive Design)
- Web Technologies: HTML5, CSS3, RESTful APIs, JSON
- Software Engineering: Agile Methodologies, CI/CD, Object-Oriented Programming (OOP)
- Tools & DevOps: Git, GitHub, Postman, Linux, Windows, WinSCP, PuTTY, VS Code
- Data & Enterprise: SAP (Exposure), Power BI, Data Visualization, Excel & PDF Reporting
- Core Skills: Analytical, Problem-Solving, Written and Spoken Communication, Collaboration, Digital Fluency, Decision Making
- Core Qualities: Adaptability, Customer Orientation

Projects

Driver Payroll Automation System (PHP, MSSQL, Linux)

Industry Implementation – Internship Project

- Developed a payroll automation module using PHP and MSSQL to calculate and process salaries for 50+ drivers, replacing manual spreadsheet calculations.
- Reduced manual accounting errors by 95% and improved payroll processing speed for the finance team.

Automated Printing Workflow System (PHP, Linux, Printer Integration)

Industry Implementation – Internship Project

- Built an automated printing script to generate and send delivery order documents directly to printers, replacing a legacy manual record system.
- Reduced administrative workload by 40% and improved document processing efficiency for daily operations.

Event Management Platform (Full-Stack, JavaScript, PostgreSQL, CI/CD)

- Full-Stack Engineering: Engineered a real-time messaging system for 50+ users; architected a friendship engine that improved data retrieval speeds by 30%.
- Security & DevOps: Integrated WebSockets, JWT, and CI/CD pipelines to ensure a 100% secure and automated deployment environment.
- Social Features: Implemented friend-making, private accounts, direct messaging, and profile photo uploads to enhance user interaction and engagement.

Web Security Audit Project (Cybersecurity, OWASP, Pentesting)

- Vulnerability Mitigation: Identified and mitigated 10 critical OWASP vulnerabilities; implemented SQLi and XSS protections to harden 100% of application defenses.
- Risk Assessment: Executed penetration testing across 3+ staging environments to verify the integrity and encryption of sensitive enterprise data.
