

PHWAY PHWAY

Software Developer

ABOUT ME

I'm a graduate of Diploma in Information Technology (Software Development) with one year of internship experience in full-stack development, databases, and enterprise systems. Skilled in PHP, JavaScript, SQL, and system integration, I'm motivated to keep learning, take on new challenges, and grow as a software developer.

WORK EXPERIENCE

Software Developer Intern

Noel Gifts International Ltd, Singapore (2025 – 2026)

- Developed and enhanced full-stack internal web systems integrated with SAP and SQL databases, improving data management, reporting, and operational efficiency.
- Automated repetitive processes and built Power BI dashboards (including RFM analysis) to generate actionable insights for business decision-making.
- Supported enterprise server migration, system testing, deployment, and user troubleshooting, ensuring stable performance and smooth rollouts with minimal downtime.

Part-Time Work Experience (During Studies)

Singapore (2023– Present)

- Worked in fast-paced hospitality while balancing full-time studies, building adaptability and time management.
- Strengthened teamwork and communication skills in dynamic environments.

PROJECTS

Driver Payroll System (PHP, JavaScript, SQL, HTML/CSS)

- Developed full-stack internal payroll application during internship
- Calculated staff earnings and managed rate structures
- Generated PDF and Excel reports
- Responsive frontend with secure backend processing

Cleaning Service System (Java, SQL, HTML/CSS)

- Built Java-based management system with reporting features
- Implemented admin module with full CRUD operations
- Managed staff and service data efficiently

University Web Application (JavaScript, HTML/CSS, GitHub)

- Developed web application in a team of four
- Used GitHub for version control and collaboration
- Contributed to frontend design, interactive features, and API integration
